riginate in the surfaces, either externally of peace, prosperity and happiness. to give us notice of their derangement and city in the mighty West. weakening the vital energies of the patient, we have finde to fear. in place of assisting the motive powers, or vital energies to throw off the obstructions. But before proceeding to indicate our restorative theory; we propose to state our restorative theory; we propose to state briefly some of the pathological indications and primary causes that produce this apand primary causes that produce this ap

suming that the human being physically overdone, so much so that it requires a continuated in Pic-nis style, and organically considered, is a machine for orthe holder to keep the plow level, take it also for the holder to keep the plow level, take it also for the most perfect kind, supplied with all together we think it one onthe best plows we have been as manifested in feeding and clothing the the apparatus, and surrounded by all the Washington Hoteland our farmers will do well to the afflicted, regardless of all interests, ex. a commolious Hell; but now, we are hap nection, that a committee on refreshments conditions to enable it to operate freely and give him call. harmoniously, supporting health and hap piness for three score years and ten, or unand continued operation wears out. But through negligence, superstition and ignorance, man (foolish man!) violates many of the laws of nature and nature's God touching the operation of this beautiful machine consequently derangement and disease ensue. Now the stomach is the great reservoir, mill or furnace that receives the raw material to be elaborated for generating anmal heat, rebuilding the decayed and decaying parts, and sustaining universal vigor and vitality in this wonderful machine. This machine is supplied with its myriads of little mouths, situated internally to drink up the surplusage, and pass it off through their little capillary tubes by the opening of their valves upon the surface; the nutritive portion of this raw material is resolved into its primitive elements and taken up by the absorbents and carried into the the machine imparting vigor, and making the necessary deposits for the restoration.

And preservation of its parts. Man (or the mind of man) is constituted the engineer of this machine, and if, through negligence, or otherwise, he suffers those little scape valves to collapse or close, the consequence is their tubes become gorged with more. is, their tubes become gorged with morbid matter and the little suckers become closed, and the stomach and intestinal canal-have to bear the burthen of obstruction, their contents become vitiated, and the motive power, and vital current fail to receive their accustomed supplies. The heart inpetite, dryness of the skin, and accelerated ment:
